

Naperville Community Unit School District 203

SMS Number Addition/Revision/Removal

Student Name _____ School _____

Student I.D. Number _____ Home Phone _____

This form is used to add, revise or remove a parent/guardian SMS (Short Message Service - mobile text messaging) number in your student's records. Mobile text messaging will only be used by District 203 in emergency situations.

Even if you have previously provided a cell phone number to the District, you must also specifically designate the same number again as your SMS number if you want to receive emergency text messaging. District 203 does not assume that cell phone numbers in student records are authorized to receive SMS text messages.

District 203 systems allow only one SMS number per family. Please be assured that emergency communications from District 203 will always be issued through every avenue available: phone call to all parent/guardian numbers, website, email and SMS text messaging.

After you add a new SMS number to your student's records, you will receive a one-time text message at that number to confirm your participation. Please note that, depending upon your cell phone service, you may incur charges for SMS messages.

Please fill out the information below and return the completed form to your school office.

Check one:

I want to add the new SMS number below.

I want to change my existing SMS number to the new one below.

The old number is: _____

I want to completely remove my existing SMS number below from my student's records.
