

Screenwise: Learning and Thriving with 1:1

As part of our Digital Learning Initiative, Naperville 203 welcomes Dr. Devorah Heitner to lead parent information nights for our 5th grade families. Dr. Heitner will focus on strategies for elementary parents related to Raising Digital Natives. Parents will leave with confidence and easy to implement strategies for working with their students in this digital age.

The talk empowers parents to mentor their students on best uses of both school and personal technology. Parents will hear ideas for cultivating balanced use of technology, and learn about the skills students need to be successful in their digital interactions. Dr. Heitner will provide tips on how to help students focus and avoid distractions, and become responsible and thoughtful digital citizens. The talk will also address parenting elementary students as they use social media, online games, and texting to socialize.

PLEASE JOIN US FOR OUR 5TH GRADE TALKS ACROSS THE DISTRICT!

RSVP with number attending, home school name & date attending:

Speaker: Devorah Heitner, PhD, RAISING DIGITAL NATIVES

An experienced speaker, workshop leader, and consultant, Devorah Heitner, PhD founded **Raising Digital Natives** to nurture a culture of responsible digital citizenship in schools and organizations. Dr. Heitner has spoken at SXSWedu, TEDx, NAIS, ICTL Singapore, ISTE, Google, and numerous other conferences, schools, and corporations. Her keynotes engage audiences with fresh insights about digital natives, communication across the generations, and growing up in the digital age.

Check out her TEDx talk; <http://raisingdigitalnatives.com/>
