## SCIENCE CAMPS

## DO YOU ♥ SCIENCE?

*Join us for one of our Summer Science Camps and explore, investigate, experiment and discover the world of science at Cantigny.*

### **Nature Explorers at Cantigny**

**July 10-14 | 9:30 am-12 pm | \$75 per child**

**Ages: Students entering grades 4-6**

Come explore Cantigny's animal, plant, and butterfly populations to find out what makes them so remarkable! Did you know plants and animals can camouflage? Find out about some of the many adaptations that help animals survive in their habitats. We'll be investigating, exploring, and experimenting each day, but we'll also be creating art and discovering stories to make camp an even more immersive, hands-on experience!

### **Water Explorations at Cantigny**

**July 10-14 | 1-3:30pm | \$75 per child**

**Ages: Students entering grades 4-6**

We all need water to drink, but what are other ways that water affects our lives? We'll be talking about the water cycle, making our own water filters, checking out animal life under water, and using hands-on science to investigate the world around us. Experiments, stories and art will make the science come to life!

**Visit [Cantigny.org](http://Cantigny.org) or call 630.668.5161 to register.**
