

# STEAM CAMP

Safe n' Sound YMCA is excited to announce their newest camp!  
STEAM stands for Science, Technology, Engineering, Art, and Math.  
STEAM Camp is a taught by a licensed teacher and will provide children going into grades 1-4 an opportunity to have a summer filled with scientific investigations, games, crafty projects, and fun!  
Keep your child's mind active and engaged throughout the summer.

## Session One (June 19)

### If You Build It..

Join us for amazing engineering experiments! Learn about the basics of architecture and work as a team to build and design different structures.

## Session Two (June 26)

### Crazy Concoctions

Goop Rules! Join us for a wacky week of creating concoctions, some of them edible, some too icky to think about eating! Kids will make magnetic slime, bath bombs, Magic Mud and even homemade ice cream!

## Session Three (July 10)

### Amazing Animals

Calling all animal lovers and future zoologists! All week we will be learning about animals and their habitats. We will have a few furry friends stop by as well.

## Session Four (July 17)

### littleBits

Campers will go through a complete scientific journey of invention, through challenges and team building.

## Session Five (July 24)

### Mini Monets

Any budding artist will love this week! Learn about famous artists such as DaVinci, Kusama and Monet, work in the same mediums those artists worked with.

## Session Six (July 31)

### Super Hero Science

Tony Stark worked with technology to create Iron Man. Campers will dissect the science behind super heroes. Design new gear for your favorite super hero to help them fight crime!
