

Naperville Community Unit School District 203

Student Data Privacy Overview

Our Commitment

Naperville Community Unit School District 203 is committed to protecting all student data from individuals or organizations who have no legal or educational purpose for that data. District 203 is required to protect student data by several state and federal laws and guidelines including SOPPA, FERPA, COPPA, CIPA, and HIPAA, which are summarized below. District 203 is subject to strict penalties if student information is misused or compromised. District 203 protects student data through comprehensive privacy policies and multiple layers of security measures such as firewalls, data encryption, secure servers, external monitoring, access auditing, and intrusion detection/remediation software.

State and Federal Laws & Guidelines

Naperville Community Unit School District 203 is required by law to follow a variety of state and federal law and guidelines regarding the protection of student data.

<u>SOPPA</u> Student Online Personal Protection Act (State of Illinois)	<u>FERPA</u> Family Education Rights Privacy Act (US Department of Education)	<u>COPPA</u> Children’s Online Privacy Protection Act (Federal Trade Commission)	<u>CIPA</u> Children’s Internet Protection Act (Federal Communications Commission)	<u>HIPAA</u> Health Insurance Portability and Accountability Act (US Department of Health & Human Services)

Why is this student data collected?

Data is collected, but may not be limited to, for the following reasons:

- For educational purpose of determining the needs of a student
- For determining student placement into various programs
- For special education determination purposes
- For providing communications to students and families
- For reporting required by state or federal agencies such as the Illinois State Board of Education, the United State Department of Education, Regional Office of Education, Illinois Department of Health, etc.
- For reporting to colleges and universities for acceptance purposes

Who has access to student data?

Policies are in place that limit access to student data based on an individual's role within District 203 and what is referred to as their "legitimate educational interest" in information. Access to data is restricted to trained, qualified individuals who only have access to the specific data they need in order to do their jobs. Teachers, principals, and other administrators have access to the widest range of information, allowing them to monitor a student's progress in school.

District 203 works with a variety of outside entities that provide services or applications necessary for delivering instruction and District operations, which requires sharing of student data. These outside entities receive only the information about a student that is required to provide particular services. Some entities such as School board members, the Illinois Department of Education, and the U.S. Department of Education receive aggregated information that allows them to understand how our schools are performing and make decisions about programs and resources.

Parents have the right to inspect their student's data for accuracy at any time and in some cases may have the right to prevent student data from being shared. In the event a parent does choose to not have their student's data shared, this may result in degraded experience and/or limit student's access to tools and learning aids used in their education.
