

Grade 5 Yearlong Mathematics Map

Resources: Approved from Board of Education

Assessments: District Benchmark Assessments

Common Core State Standards – Standards for Mathematical Practice:

- | | |
|---|---|
| 1. Make sense of problems and persevere in solving them. | 2. Reason abstractly and quantitatively. |
| 3. Construct viable arguments and critique the reasoning of others. | 4. Model with mathematics. |
| 5. Use appropriate tools strategically. | 6. Attend to precision. |
| 7. Look for and make use of structure. | 8. Look for and express regularity in repeated reasoning. |

Domain	Cluster	Common Core Standard	Content	Skills	Academic Vocabulary
OA	Write and interpret numerical expressions.	5.OA.1 Use parentheses, brackets, or braces in numerical expressions, and evaluate expressions with these symbols.	Numerical Expressions	5.OA.1 Write numerical expressions using parentheses, brackets, or braces.	
OA	Write and interpret numerical expressions.	5.OA.1 Use parentheses, brackets, or braces in numerical expressions, and evaluate expressions with these symbols.	Numerical Expressions	5.OA.1 Evaluate numerical expressions using parenthesis, brackets, or braces.	Evaluate=solve
OA	Write and interpret numerical expressions.	5.OA.2 Write simple expressions that record calculations with numbers, and interpret numerical expressions without evaluating them. For example, express the calculation “add 8 and 7, then multiply by 2” as $2 \times (8 + 7)$. Recognize that $3 \times (18932 + 921)$ is three times as large as $18932 + 921$, without having to calculate the indicated sum or product.	Simple expressions	5.OA.2 Write simple expressions that record calculations with numbers without evaluating them.	Evaluate=solve

Domain	Cluster	Common Core Standard	Content	Skills	Academic Vocabulary
OA	Analyze patterns and relationships.	5.OA.3 Generate two numerical patterns using two given rules. Identify apparent relationships between corresponding terms. Form ordered pairs consisting of corresponding terms from the two patterns, and graph the ordered pairs on a coordinate plane. For example, given the rule “Add 3” and the starting number 0, and given the rule “Add 6” and the starting number 0, generate terms in the resulting sequences, and observe that the terms in one sequence are twice the corresponding terms in the other sequence. Explain informally why this is so.	Numerical Patterns	5.OA.3 Generate two numerical patterns using two given rules.

NBT	Understand the place value system.	5.NBT.1 Recognize that in a multi-digit number, a digit in one place represents 10 times as much as it represents in the place to its right and 1/10 of what it represents in the place to its left.	Place Value	5.NBT.1 Recognize that in a multi-digit number, a digit in any place represents 10 times as much as it represents in the place to its right and 1/10 of what it represents in the place to its left.	
NBT	Understand the place value system.	5.NBT.2 Explain patterns in the number of zeros of the product when multiplying a number by powers of 10, and explain patterns in the placement of the decimal point when a decimal is multiplied or divided by a power of 10. Use whole-number exponents to denote powers of 10.	Multiplication Place Value Number Patterns	5.NBT.2 Explain patterns in the number of zeros of the product when multiplying a number by powers of 10.	Powers of 10

Domain	Cluster	Common Core Standard	Content	Skills	Academic Vocabulary
NBT	Understand the place value system.	5.NBT.2 Explain patterns in the number of zeros of the product when multiplying a number by powers of 10, and explain patterns in the placement of the decimal point when a decimal is multiplied or divided by a power of 10. Use whole-number exponents to denote powers of 10.	Multiplication Division Number Patterns	5.NBT.2. Explain patterns in the placement of the decimal point when a decimal is multiplied or divided by a power of 10.	Powers of 10
NBT	Understand the place value system.	5.NBT.2 Explain patterns in the number of zeros of the product when multiplying a number by powers of 10, and explain patterns in the placement of the decimal point when a decimal is multiplied or divided by a power of 10. Use whole-number exponents to denote powers of 10.	Whole-Number Exponents	5.NBT.2. Write whole number exponent to denote powers of 10 (Scientific Notation)	Exponents
NBT	Understand the place value system.	5.NBT.3 Read, write, and compare decimals to thousandths.		5.NBT.3 Read, write, and compare decimals to thousandths.	
NBT	Understand the place value system.	5.NBT.3a Read and write decimals to thousandths using base-ten numerals, number names, and expanded form, e.g., $347.392 = 3 \times 100 + 4 \times 10 + 7 \times 1 + 3 \times (1/10) + 9 \times (1/100) + 2 \times (1/1000)$.	Decimal Place Value	5.NBT.3a Read decimals to thousandths using standard form, written form, and expanded form.	
NBT	Understand the place value system.	5.NBT.3a Read and write decimals to thousandths using base-ten numerals, number names, and expanded form, e.g., $347.392 = 3 \times 100 + 4 \times 10 + 7 \times 1 + 3 \times (1/10) + 9 \times (1/100) + 2 \times (1/1000)$.	Decimal Place Value	5.NBT.3a Write decimals to thousandths using standard form, written form, and expanded form.	
NBT	Understand the place value system.	5.NBT.3b Compare two decimals to thousandths based on meanings of the digits in each place, using $>$, $=$, and $<$ symbols to record the results of comparisons.	Decimal Place Value	5.NBT.3b Compare two decimals to thousandths using $>$, $=$, $<$.	
NBT	Understand the place value system.	5.NBT.4. Use place value understanding to round decimals to any place.	Decimal Place Value	5.NBT.4. Round decimals to a given place value.	Thousandths, Rounding
NBT	Perform operations with multi-digit whole numbers and with decimals to hundredths.	5.NBT.5 Fluently multiply multi-digit whole numbers using the standard algorithm.	Multiplication	5.NBT.5 Fluently multiply multi-digit whole numbers using the standard algorithm.	

Domain	Cluster	Common Core Standard	Content	Skills	Academic Vocabulary
NBT	Perform operations with multi-digit whole numbers and with decimals to hundredths.	5.NBT.6 Find whole-number quotients of whole numbers with up to four-digit dividends and two-digit divisors, using strategies based on place value, the properties of operations, and/or the relationship between multiplication and division. Illustrate and explain the calculation by using equations, rectangular arrays, and/or area models.	Division	5.NBT.6 Compute whole-number quotients of whole numbers with up to four-digit dividends and two-digit divisors by applying various strategies.	
NBT	Perform operations with multi-digit whole numbers and with decimals to hundredths.	5.NBT.6 Find whole-number quotients of whole numbers with up to four-digit dividends and two-digit divisors, using strategies based on place value, the properties of operations, and/or the relationship between multiplication and division. Illustrate and explain the calculation by using equations, rectangular arrays, and/or area models.	Division	5.NBT.6 Illustrate and explain the calculation by using equations, rectangular arrays, and/or area models.	Rectangular Arrays
NBT	Perform operations with multi-digit whole numbers and with decimals to hundredths.	5.NBT.7 Add, subtract, multiply, and divide decimals to hundredths, using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method and explain the reasoning used.	Addition/Subtraction Decimals	5.NBT.7 Add and subtract decimals to hundredths place with concrete models or drawings and strategies based on place value.	
NBT	Perform operations with multi-digit whole numbers and with decimals to hundredths.	5.NBT.7 Add, subtract, multiply, and divide decimals to hundredths, using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method and explain the reasoning used.	Multiply Decimals	5.NBT.7 Multiply decimals to hundredths place with concrete models or drawings and strategies based on place value.	
NBT	Perform operations with multi-digit whole numbers and with decimals to hundredths.	5.NBT.7 Add, subtract, multiply, and divide decimals to hundredths, using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method and explain the reasoning used.	Divide Decimals	5.NBT.7 Divide decimals to hundredths place with concrete models or drawings and strategies based on place value.

Decimal Operations	5.NBT.7 Explain reasoning when performing operations with decimals to the hundredths place.	
NF	Use equivalent fractions as a strategy to add and subtract fractions.	5.NF.1 Add and subtract fractions with unlike denominators (including mixed numbers) by replacing given fractions with equivalent fractions in such a way as to produce an equivalent sum or difference of fractions with like denominators. For example, $\frac{2}{3} + \frac{5}{4} = \frac{8}{12} + \frac{15}{12} = \frac{23}{12}$. (In general, $\frac{a}{b} + \frac{c}{d} = \frac{ad + bc}{bd}$.)	Addition/Subtraction Fractions	5.NF.1 Add and subtract fractions with unlike denominators	Equivalent Fractions
NF	Use equivalent fractions as a strategy to add and subtract fractions.	5.NF.1 Add and subtract fractions with unlike denominators (including mixed numbers) by replacing given fractions with equivalent fractions in such a way as to produce an equivalent sum or difference of fractions with like denominators. For example, $\frac{2}{3} + \frac{5}{4} = \frac{8}{12} + \frac{15}{12} = \frac{23}{12}$. (In general, $\frac{a}{b} + \frac{c}{d} = \frac{ad + bc}{bd}$.)	Addition/Subtraction Mixed Number	5.NF.1 Add and subtract mixed numbers with unlike denominators	Equivalent Fractions
NF	Use equivalent fractions as a strategy to add and subtract fractions.	5.NF.2 Solve word problems involving addition and subtraction of fractions referring to the same whole, including cases of unlike denominators, e.g., by using visual fraction models or equations to represent the problem. Use benchmark fractions and number sense of fractions to estimate mentally and assess the reasonableness of answers. For example, recognize an incorrect result $\frac{2}{5} + \frac{1}{2} = \frac{3}{7}$, by observing that $\frac{3}{7} < \frac{1}{2}$.	Add/Subtract Fractions	5.NF.2 Solve word problems involving addition and subtraction of fractions with like and unlike denominators.	

Domain	Cluster	Common Core Standard	Content	Skills	Academic Vocabulary

Use benchmark fractions and number sense of fractions to estimate mentally and assess the reasonableness of answers. For example, recognize an incorrect result $2/5 + 1/2 = 3/7$, by observing that $3/7 < 1/2$.	Add/Subtract Fractions	5.NF.2 Estimate mentally and assess the reasonableness of the answer using benchmark fractions.	Benchmarks
NF	Apply and extend previous understandings of multiplication and division to multiply and divide fractions.	5.NF.3 Interpret a fraction as division of the numerator by the denominator ($a/b = a \div b$). Solve word problems involving division of whole numbers leading to answers in the form of fractions or mixed numbers, e.g., by using visual fraction models or equations to represent the problem. For example, interpret $3/4$ as the result of dividing 3 by 4, noting that $3/4$ multiplied by 4 equals 3, and that when 3 wholes are shared equally among 4 people each person has a share of size $3/4$. If 9 people want to share a 50-pound sack of rice equally by weight, how many pounds of rice should each person get? Between what two whole numbers does your answer lie?	Multiply/Divide Fractions	5.NF.3 Interpret a fraction as division of the numerator by the denominator.

Multiplication of Fractions	5.NF.6 Solve real world problems involving multiplication of fractions and mixed numbers, e.g., by using visual fraction models or equations to represent the problem.	
NF	Apply and extend previous understandings of multiplication and division to multiply and divide fractions.	5.NF.7 Apply and extend previous understandings of division to divide unit fractions by whole numbers and whole numbers by unit fractions.	Division of Fractions	5.NF.7 Apply and extend previous understandings of division to divide unit fractions by whole numbers and whole numbers by unit fractions.	

Domain	Cluster	Common Core Standard	Content	Skills	Academic Vocabulary
NF	Apply and extend previous understandings of multiplication and division to multiply and divide fractions.	5.NF.7a Interpret division of a unit fraction by a non-zero whole number, and compute such quotients. For example, create a story context for $(1/3) \div 4$, and use a visual fraction model to show the quotient. Use the relationship between multiplication and division to explain that $(1/3) \div 4 = 1/12$ because $(1/12) \times 4 = 1/3$.	Division of Fractions	5.NF.7a Interpret division of a unit fraction by a non-zero whole number, and compute such quotients	
NF	Apply and extend previous understandings of multiplication and division to multiply and divide fractions.	5.NF.7b Interpret division of a whole number by a unit fraction, and compute such quotients. For example, create a story context for $4 \div (1/5)$, and use a visual fraction model to show the quotient. Use the relationship between multiplication and division to explain that $4 \div (1/5) = 20$ because $20 \times (1/5) = 4$.	Division of Fractions	5.NF.7b Interpret division of a whole number by a unit fraction, and compute such quotients.	
NF	Apply and extend previous understandings of multiplication and division to multiply and divide fractions.	5.NF.7c Solve real world problems involving division of unit fractions by non-zero whole numbers and division of whole numbers by unit fractions, e.g., by using visual fraction models and equations to represent the problem. For example, how much chocolate will each person get if 3 people share $1/2$ lb of chocolate equally? How many $1/3$ -cup servings are in 2 cups of raisins?	Division of Fractions	5.NF.7c Solve real world problems involving division of unit fractions by non-zero whole numbers and division of whole numbers by unit fractions, e.g., by using visual fraction models and equations to represent the problem.	
MD	Convert like measurement units within a given measurement system.	5.MD.1 Convert among different-sized standard measurement units within a given measurement system (e.g., convert 5 cm to 0.05 m), and use these conversions in solving multi-step, real world problems.	Measurement	5.MD.1 Convert among different-sized standard measurement units within a given measurement system	
MD	Convert like measurement units within a given measurement system.	5.MD.1 Convert among different-sized standard measurement units within a given measurement system (e.g., convert 5 cm to 0.05 m), and use these conversions in solving multi-step, real world problems.	Measurement	5.MD.1 Apply conversions in solving multi-step, real world problems.	

Domain	Cluster	Common Core Standard	Content	Skills	Academic Vocabulary
MD	Represent and interpret data.	5.MD.2 Make a line plot to display a data set of measurements in fractions of a unit ($\frac{1}{2}$, $\frac{1}{4}$, $\frac{1}{8}$). Use operations on fractions for this grade to solve problems involving information presented in line plots. For example, given different measurements of liquid in identical beakers, find the amount of liquid each beaker would contain if the total amount in all the beakers were redistributed equally.	Data	5.MD.2 Make a line plot to display a data set of measurements in fractions of a unit ($\frac{1}{2}$, $\frac{1}{4}$, $\frac{1}{8}$)
