

## Honors Senior Rhetoric Summer Reading Project 2021

### Introduction to Honors Senior Rhetoric

Welcome! The major goal of this course is to expose you to the wide variety of writing assignments that you will encounter in college and beyond. As a result, a heavy emphasis will be placed on research and synthesis. While these skills are not new to you, there is still much to be learned about generating research questions, conducting an exhaustive review of relevant literature, and creating a claim/conclusion based on sound reasoning techniques.

To build these skills, you will complete an extended research task that will serve as the benchmark experience for this course. In brief, you will choose a topic/focus early in the course, and then you will spend the rest of the semester researching your topic, consulting texts from various genres. Once all of your information is compiled, including personal experience and primary sources, you will produce a final product that synthesizes your research and presents an arguable claim generated from your findings.

To be successful with this project, it is crucial to find an “inspiration text” that introduces you to the topic and helps you to generate research questions that will guide your review of sources. To get you started, your summer reading project will ask you to select your topic and your inspiration text. We want you to take the time to truly read and savor your selected text.

### Guidelines

- Make sure that the text represents a topic that you are truly passionate about because you will live with this topic for the entire semester. We have attached a list of books, broken down by topic, for you to peruse if necessary. You are not limited to the books on this list. Hopefully, the list will be a guide, but you are free to select your own text. All of the books on the list are available in the NCHS LRC.
- The text that you select should be nonfiction, but please **do not select a memoir.**
- The majority of the text should be written in 3<sup>rd</sup> person and contain research.
- You **MAY NOT** use a text that you have been assigned to read for ANY of your previous classes.

### Process

- 1) Select the text that will form the foundation of your project, making sure that it presents a topic that you are passionate about and would be willing to spend a full semester exploring.
- 2) Read and annotate the book, concentrating on identifying questions that the book raises that would necessitate further research and study. Since you will spend all semester exploring this topic, you need to establish a series of in depth questions that help you to cover the full breadth of the topic.

- 3) Come to the first day of class with your topic and initial research questions fleshed-out and ready to present to your peers. Bring your book with you.

**Notes:**

1. While there is no formal piece of writing attached to this assignment, it is crucial that you engage in a deep read of your selected text. It will serve as the basis of many formative assignments geared towards getting you started with your research project.

Happy Reading!
